CYMBIDIUMS

SPECIAL PRICE LIST FOR 1947

This catalogue contains offerings of seedlings, back bulbs and mature plants of Cymbidium. The seedlings are in community pots and in small singles. The standard four-inch communities contain a minimum of 10 plants each and are priced and sold as units only. The back bulbs are large and firm with at least one good eye; they are dormant and are not potted. All of the mature plants have bloomed for the last two years. Plants of all sizes are in a vigorous healthy condition. They are priced both by size and by hybrid quality.

The plants in the first part of the catalogue are available in fairly large quantities. Those under the heading "Available in Limited Quantity Only" are for the most part represented by numbers of six or less. Judging by current demand, these plants will not remain in stock for long, so an immediate reply would be desirable.

We have records of the type of flowers of all of the mature plants. The descriptions given to each number include the range of flower color within the lot. If you desire a special type, please send us a description and we shall do our best to fill the order. In the case of the unflowered seedlings it is obviously not possible to give an accurate description of the flower color or form, since these characters are extremely variable in Cymbidium hybrids. Such plants are listed with descriptions of their parents.

Please send no money until you have received confirmation of your order. This will prevent confusion on those plants available only in limited quantities.

Terms: Cash before shipment; \$10.00 minimum; packing free of charge; shipping costs extra.

PLANTS AVAILABLE IN QUANTITY

Hybrid No.	NAME AND DESCRIPTION	Pot Size	Price Per Pot
K-95	C. ALEXANDERI var. WESTONBIRT X PEREGRINE This mating uses as one parent the well known variety of Alexanderi which has made notable contributions to the production of superior modern hybrids.	2½"	\$ 5.00
K-96	C. (CONINGSBYANUM x FLAMINGO) X PEREGRINE This mating should provide contrast to the one above. The first parent is a derivative of grandiflorum, one of the most desirable species.	2½"	4.00
S-148	C. JOY SANDER X INCA II This Joy Sander was produced by mating the Compte de Hemptinne var. of Pauwelsii with the F. J. Hanbury var. of Ceres. It has striking dark flowers. The Inca II parent is a large, faintly flushed white which has a heavy texture.	Community 2½"	15.00 4.50
S-159	C. LOUIS SANDER X CERES var. F. J. HANBURY, F.C.C., R.H.S. Louis Sander bears large flowers of superior texture. The Ceres parent has flowers with petals and sepals of rich reddish brown and lips marked with a dark band of a size and position similar to that in Lowianum.	2"	3.50
S-163	C. JANETTE X PLOVER, A.M. The former parent has light pink flowers of good texture and size. The latter parent is a superior derivative of Lowio-grandiflorum and Pauwelsii.	Community 2"	12.50 3.50
2145	C. RHODA (Flamingo x Pauwelsii) The plants of this hybrid have proved to be free flowering. The flowers are of medium pink; generally the petals and sepals are well veined. A few plants have cream-colored flowers or cream suffused with pink. The lip is variously marked with reddish-purple areas. Mature plants.	5" 6" 7"	17.50 22.50 30.00
2146	C. VESTA var. ROSY MORN, A.M. X PROFUSION Plants are very free flowering. Flowers are medium pink and have deep pink veins. The lip has reddish-purple markings. Mature plants.	6½" 7½"	27.50 32.50
2158	C. ALEXANDERI var. HAMILTON SMITH X WARBLER In addition to plants with pink flowers, some with yellow, yellow-green, and those colors suffused with pink to varying degrees have bloomed this year. The lips have reddish-purple spots and blotches of a variety of sizes. Mature plants.	5" 6"	20.00 25.00

Clarelen Orchids

Hybrid No.	NAME AND DESCRIPTION	Pot Size	Price Per Pot
2159	C. PRESIDENT WILSON X JOY SANDER The color of the flowers is a warm yellowish brown and is accentuated by bright lip markings of reddish-purple over white or cream. Mature plants.	6" 7"	\$25.00 30.00
2160	C. JOYFUL (Ceres x Joy Sander) The flower color ranges from light cream to darker shades of brown. The lips are marked with areas of madder-purple. The Fire King variety of Ceres and the Rio Tinto variety of Joy Sander were used as parents. Mature plants.	5" 6" 7"	20.00 25.00 30.00
2162	C. JANETTE (Joy Sander x Alexanderi var. Westonbirt) The flowers of this hybrid are white or white flushed with pink. The lips are marked with purple. Of good size and quality. Mature plants.	4" 4½" 5"	17.50 20.00 25.00
2163	C. PAPILLON (Butterfly var. Regina x Ceres var. F. J. Hanbury) This hybrid ranges through yellow-green, yellow, pink and mixed colors. The lips are variously marked with purple and reddish-purple. Mature plants.	5" 6"	20.00 25.00
2169	C. LOWIO-GRANDIFLORUM X MIRABELLE, F.C.C., R.H.S. The background color of the flowers is yellow, green, or yellow-green. It is frequently suffused with brown. The lip is marked with an area of dark reddish-brown. Mature plants.	4½" 5"	22.50 25.00
3025	C. CONINGSYANUM X CAPRICE Two species, grandiflorum and insigne Sanderae, which have contributed so many outstanding plants, occur rather recently in the parentage of this hybrid.	4½"	20.00
3026	C. PEARL X CARISBROOK The parentage of this hybrid involves nearly all the species which enter modern commercial hybrids. Good sized flowers of superior texture are expected.	4½"	20.00
3027	C. ALEXANDERI X CARISBROOK The species, insigne Sanderae, occurs most frequently in the ancestry of this hybrid.	4" 4½"	17.50 20.00
3036	C. LOUIS SANDER (C. Ceres x Alexanderi, Westonbirt var.) This hybrid produces flowers of superior texture and coloring.	2½" 4" 4½"	4.00 20.00 25.00
